

## Student guide for creating PDFs

As our classes at UCCS transition to online environments, you will be asked to scan and upload assignments, projects, and maybe even exams to Canvas. We will be asking you to create PDFs of your work (not jpg or png file formats). There are many free apps available to turn your phone into a PDF scanner. Here are some of your options:

### Scanner Apps for your phone:

Adobe Scan (for Android and for iOS):

<https://acrobat.adobe.com/us/en/mobile/scanner-app.html>

CamScanner (for Android and for iOS):

<https://www.camscanner.com/user/download>

Tiny Scanner (for Android and for iOS):

<https://play.google.com/store/apps/details?id=com.appxy.tinyscanner&hl=en>  
<https://apps.apple.com/us/app/tiny-scanner-pdf-scanner-to/id595563753>

### Tools for Converting jpg files to pdfs on your computer:

 **Smallpdf** <https://smallpdf.com/jpg-to-pdf>

**JPG to PDF** <https://jpg2pdf.com/>

## Student guide for creating PDFs

**Mac Users:** On a mac environment, open the file in Preview and then from the “File” menu, choose “Export as a PDF ...”. Then, click “save.
